Continue west about 1 mile then turn left (i.e. south) onto a gravel road. Park at the road barrier. Walk in on the road until coming to the upper edge of a high terrace which overlooks a large clearcut. C-R1-01 is at the toe of this terrace. Follow the road, along the rim of the terrace, past the upper end of C-R1-01. Bear left at the "Y" in the road continuing along the rim of the terrace. From the road work up the hogback to the southeast and follow the river upstream to the next oxbow. C-R2-01 is located on the downstream side of the oxbow.

**FISH ACCESS AND CURRENT USE:** C-R2-01 has very limited, if any, fish access use due to a 10 ft cascade at the mouth. No fish were observed in the channel.

**FLOODING POTENTIAL:** Low

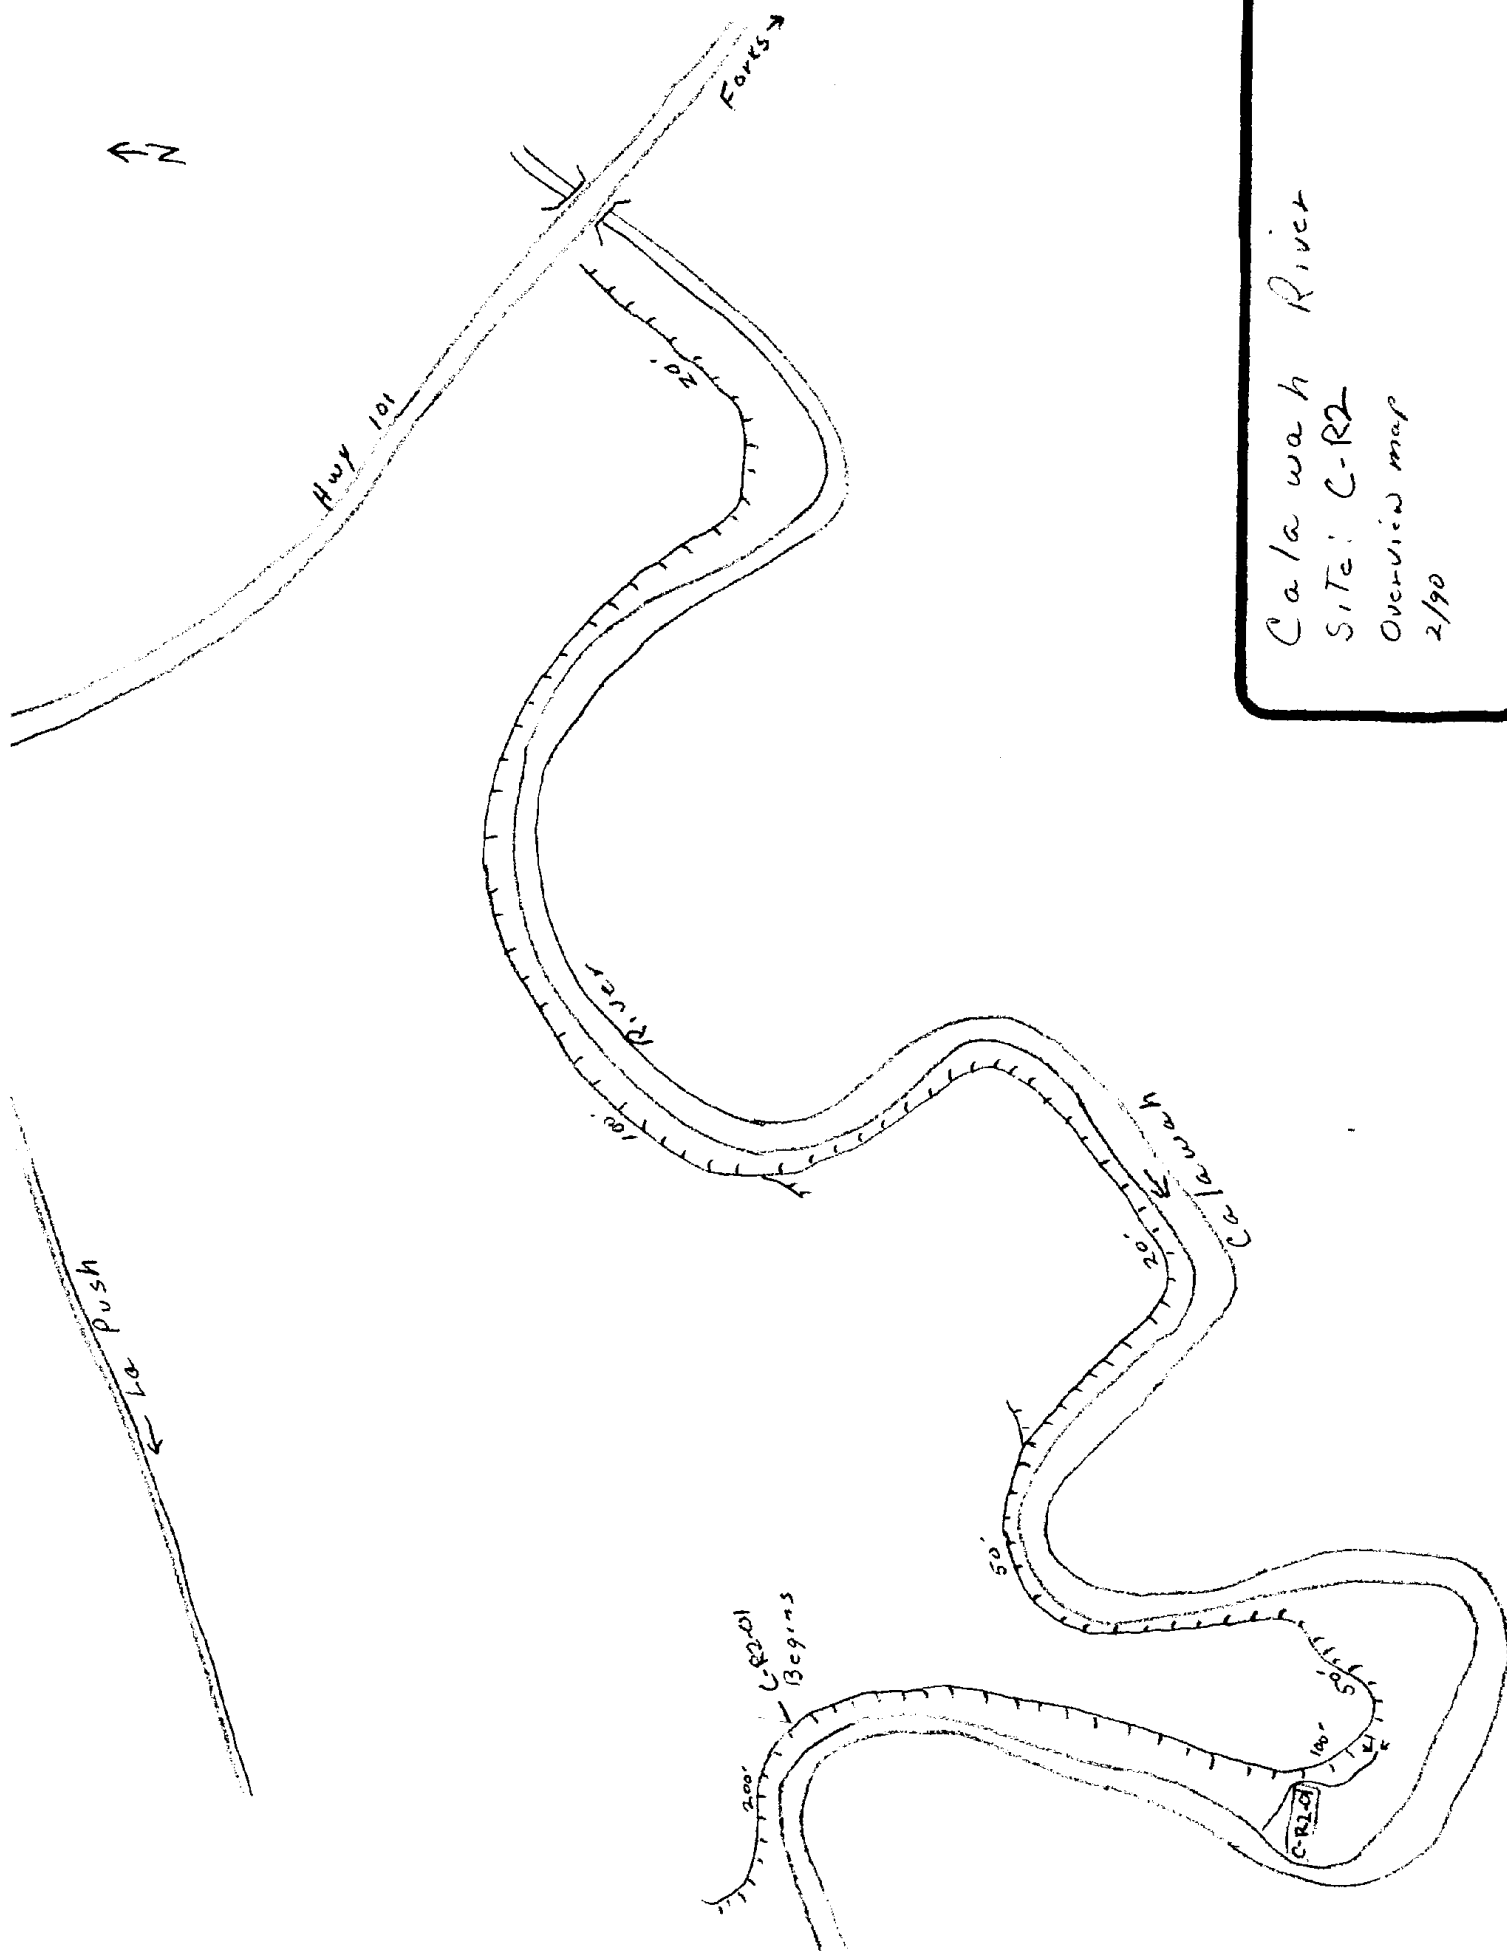

**LANDOWNER:** Unknown at this time.

**COMMENTS & RECOMMENDATIONS:** C-R2-01 is relatively short and only accessible to juvenile coho during periods of extremely high freshets. These factors, as well as poor machine and foot access make C-R2-01 a poor (i.e. low priority) candidate for habitat enhancement
